

The diagram illustrates a building facade with a red roofline at the top. The wall is divided into several sections. On the left, there is a 4x13 grid of blue squares representing solar modules. To the right of this grid are two rows of windows, each consisting of a large light blue rectangle, a smaller rectangle with horizontal lines, and another large light blue rectangle. Below these windows is a long horizontal window with a light blue background. To the right of this long window are two more windows, each with a light blue rectangle followed by two vertical grey rectangles. The bottom section of the facade is a solid green area. A white text box is overlaid on the lower left part of the facade.

Südfassade:
13 x 4 = 52 Module à 310 W
= 16.12 kWp
